Maxtek Components Signs Ferrian Sales & Associates as Midwest Representatives

BEAVERTON, Ore., May 6, 2004 — Maxtek Components Corporation, a Tektronix, Inc. company (NYSE: TEK) and a custom microelectronics assembly and test service provider, today announced a formal agreement with Ferrian Sales & Associates (FSA), a manufacturer's representative firm, to act as Maxtek's agent in the Midwestern United States.

"As representatives of a variety of manufacturers, our success is directly dependent upon our ability to select partners who complement our current offerings and aid us in meeting the needs of our customers," said Greg Ferrian, president, Ferrian Sales & Associates. "Needless to say, we're excited to be working with an assembly and test service provider of Maxtek's caliber and expertise."

"The sales cycle for design wins in the custom microelectronics packaging market is longer than the traditional electronic components model", said Tom Buzak, president, Maxtek Components Corp. "We search for potential partners who approach their business and customer relationships with a long-range view. FSA is exactly that kind of partner. Additionally, their extensive experience in the semiconductor value chain and the medical and military electronics markets is a perfect complement to Maxtek's business."

About Ferrian Sales & Associates

Based in Mendota Heights, Minnesota, Ferrian Sales & Associates meets the material, component and service needs of the Midwest's medical, military and industrial electronics markets by representing quality manufacturers and foundries. With over fourteen years of service to the advanced technology marketplace, FSA has the experience necessary to ensure our customers' success.

About Maxtek

Maxtek Components Corporation, a Tektronix, Inc. company, is a proven microelectronics assembly and test company providing a complete range of custom design, prototyping, manufacturing and test services to equipment manufacturers. With more than 30 years of experience serving the measurement, military and medical markets, Maxtek works as an extension of our customers' product teams to cost-effectively resolve the most demanding packaging and interconnect challenges. Headquartered in Beaverton, Oregon, Maxtek can be found on the web at www.maxtek.com.
